Study information

Scientific Title

Acronym
MGHP

Study hypothesis
Mastic gum is effective in eradicating Helicobacter pylori in vivo.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Ethics approval received from the Greek Medicines Agency Ethics Board on the 18th December 2005 (ref: MGCGH0032/06).

Study design
Randomised controlled trial with three arms

Primary study design
Interventional

Secondary study design
Randomised controlled trial

Study setting(s)
Hospital

Study type(s)
Treatment

Participant information sheet

Condition
Helicobacter pylori gastritis

Interventions
Patients positive to Helicobacter pylori will be randomised to receive one of the following:

1. Mastic gum 2 g per day for 14 days
2. Mastic gum 2 g per day and pantoprazole 40 mg per day for 14 days
3. Pantoprazole 40 mg per day, amoxicillin 2 g per day and clarithromycin 1 g per day for 10 days

Follow up was two months after the end of the treatment for all study arms.

Intervention Type
Drug

Phase
Not Specified

Drug/device/biological/vaccine name(s)

Mastic gum, pantoprazole, amoxicillin, clarithromycin

Primary outcome measure
Eradication of Helicobacter pylori, measured at five weeks after the end of treatment.

Secondary outcome measures
Helicobacter pylori load in patients remaining H. pylori positive, measured at five weeks after the end of treatment.

Overall study start date
01/12/2006

Overall study end date
01/06/2007

Eligibility

Participant inclusion criteria
1. Patients tested positive for H. pylori
2. Adults of either sex aged between 18 and 75 years of age

Participant type(s)
Patient

Age group
Adult

Lower age limit
18 Years

Upper age limit
75 Years

Sex
Both

Target number of participants
42

Participant exclusion criteria
1. Pregnancy
2. Malignancy
3. Allergies to pantoprazole, amoxicillin, clarithromycin

Recruitment start date
01/12/2006

Recruitment end date
01/06/2007
