Study information

Scientific Title

Study hypothesis

Does self etching primer provide satisfactory clinical performance with similar failure rates compared to conventional etch?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Treatment

Participant information sheet

Condition

Oral Health

Interventions

Randomised controlled trial: self-etching primer compared to conventional etch.

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Percentage bond failure rate.

Secondary outcome measures

Not provided at time of registration.

Overall study start date

01/12/2003

Overall study end date

30/12/2006

Eligibility

Participant inclusion criteria

Patients requiring fixed appliance treatment.

Participant type(s)

Patient

Age group

Not Specified

Sex

Not Specified

Target number of participants

40

Participant exclusion criteria

Patients who require bands or have heavily restored teeth.

Recruitment start date

01/12/2003

Recruitment end date

30/12/2006

Locations

Countries of recruitment

England
