Not specified

Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Public health, social medicine

Interventions

Teacher-delivered sex education programme/control

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Cumulative termination rate by age 20 and reported incidence of first intercourse without a condom.

Secondary outcome measures

Cognitions associated with safer sex, reported coercive sexual encounters, regretted sexual experience, use of sexual health services, etc.

Overall study start date

01/01/1996

Completion date

25/06/2005

Eligibility**Key inclusion criteria**

Non-denominational secondary state schools in Tayside and Lothian Regions and pupils attending these schools.

Participant type(s)

Patient

Age group

Child

Sex

Female

Target number of participants

24 schools, 7200 pupils (3400 in each arm)

Key exclusion criteria

Roman Catholic schools and pupils who opt out of the research.

Date of first enrolment

01/01/1996

Date of final enrolment

25/06/2005

Locations**Countries of recruitment**

Scotland

United Kingdom
